

I do benefit from listening to XM Satellite Radio and its traffic and weather channels. I have been listening since it's inception in November of 2001. The stations that I listen to on XM play music and programming choices that I do not have with standard radio. I have been paying for these services for over 2 1/2 years and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

I feel that if this is truly a free market economy and we want choices to be available to the consumers, choices will be decided by the marketplace!
